*Available in 16" only. **Available in 12" only.

Defining Style Your home is about to become even more exceptional. Handsomely crafted Gentek aluminum soffit and fascia will lend a defining touch of style to your home, while protecting the accent areas, rooflines and trim with a beautifully durable finish.

Performance Plus

One look at a beautiful home exterior will show you how dramatically the soffit and fascia affect its overall appearance. But maintaining these areas year after year can be costly and hazardous. Gentek aluminum soffit and fascia will protect your home with a long-lasting finish that requires very little upkeep. Properly installed soffit also provides essential ventilation and air circulation to help remove the excess moisture that can cause rotting and decay of the roof's structure. It promotes directional air movement through the eaves and rafters, helping your home to stay in great shape both inside and out.

Easy Upkeep

Maintaining a beautiful finish on your rooflines and trim areas will be easy with Gentek aluminum soffit and fascia. Just a simple rinse with a garden hose will remove most airborne dust and dirt to keep your home looking like new.

Design the Ideal System

Choose from a variety of soffit and fascia profiles to create the ideal system for your home.

Hi-Tensile™ Soffit Made from a specially formulated alloy that performs like heavier gauge material, Hi-Tensile features a smooth, low-gloss LoMar polyester finish that will deliver outstanding beauty and protection for your home.

PVC Supreme™ Soffit Boasting a high-performance PVC coating, this premium soffit will stand up strong against even the most punishing weather. Its luxurious semigloss finish lends a distinctive touch of elegance while providing excellent resistance to surface wear and abrasion. Available in Bright White only.

Deluxe™ Fascia Deluxe fascia features a beautifully protective LoMar polyester coating that's built to last. Its low-luster finish and smooth texture will give the rooflines and trim areas of your home a crisp, clean appearance.

Details That Make the Difference

Accentuate the architecture of your home with our TrimEssentials by Gentek® collection of trim and accessories. Choose from exquisitely crafted window and door surrounds, fluted lineals, corner posts and other exterior accents—as well as decorative shakes and scallops—to give your home personality and style.

Environmentally Friendly

Did you know that all Gentek aluminum products are produced from material that is at least 90% recycled aluminum? At the end of their long useful life, they are 100% recyclable and can be reprocessed into similar products with no loss of quality. Using recycled aluminum instead of raw materials also reduces the generation of air pollution such as carbon dioxide (CO₂), sulfur dioxide (SO₂) and nitrous oxide by 95% and water pollution by 97%.¹ Eco-friendly Gentek aluminum products further help the environment because they never need to be repainted, thereby reducing the amount of paint and other maintenance-related substances entering the waste stream.

¹LEED™ Fact Sheet, Aluminum Sheet & Plate for the Building & Construction Market, Aluminum Association, Inc.

A WORD ABOUT QUALITY

Gentek delivers the confidence and trust only a true leader can provide. We proudly stand behind our products with the full faith of our more than 40 years of manufacturing expertise and some of the strongest warranties in the industry. Our voluntary participation in rigorous quality certifications and independent testing are further assurance you have made an excellent selection for your home.

A Lifetime of Protection

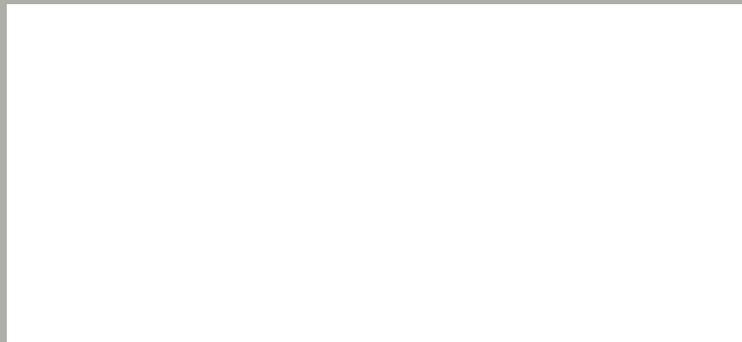

Gentek aluminum soffit and fascia are backed by a lifetime limited, non-prorated, transferable warranty—one of the strongest warranties in the industry.

For complete warranty information, including limitations, ask your dealer for a copy of the warranty.

All Gentek soffit and fascia are manufactured at plants that have earned ISO 9001:2000 certification for meeting or exceeding quality management standards recognized by more than 140 countries.

This achievement translates into better consistency and higher quality products while also increasing overall cost efficiency.
