The Plycem® Fiber Cement Trim Advantage

- Complements any siding and architecture
- Reversible for choice of textured or smooth surface
- Smooth, square edges for finished appearance
- Contains eco-friendly recycled materials
- Termite and weather-resistant
- Primed on six sides
- Non-combustible
- 50-year limited warranty*
- No specialized tools needed at the job site
- ISO 14001, ISO 9001 and OHSAS 18001 certified

Alltogether better.

Whether you want the natural look of wood, or the clean lines of a smooth finish, Allura's Plycem Trim is the perfect finishing touch. Unlike wood trim, Plycem Fiber Cement Trim is resistant to wood-boring insects and won't rot, warp or splinter, significantly reducing the need for replacement or repair. What's more, it comes ready to paint, as well as in a wide range of colors and stains. All in all, Plycem Trim frames everything beautifully.

DURABILITY

Our temperature-controlled curing and drying adheres the refined fibers and cement into tight layers that will endure years of weather exposure.

VERSATILITY

With its reversible, smooth or textured surface, Plycem Trim complements any siding product and the machined square edges ensure a superior look and finish. Plycem Trim is ideal for exterior corners, windows, columns and doors and adds grace and elegance to any style architecture.

WORKABILITY

With Plycem Trim, there is no need to have specialized tools at the jobsite. Our fiber cement is cut with the same saws and installed with the same tools traditionally used for building with wood products.

ENVIRONMENTALLY FRIENDLY

Plycem Trim is made from an amalgamation of post-industrial and post-consumer recycled materials that safeguard human health and the environment. Our manufacturing process employs principles of conservation that meet international environmental standards, including ISO 14001.

SIZES

Plycem Fiber Cement Trim is available in sizes that are economical for distributors to stock and efficient for contractors to install. The assortment of available widths and thicknesses for the standard trim makes Plycem Trim the right choice for a wide variety of applications. In addition, the 1" x 2" and 1" x 3" products mean less work on the jobsite and quick installation for special trim projects.

Size (Thickness)	Width						
	2" (1-1/3")	3" (2-1/2")	4" (3-1/2")	6" (5-1/2")	8" (7-1/4")	10" (9-1/4")	12" (11-1/4")
4/4 (3/4")	•	•	•	•	•	•	•
5/4 (1")	•	•	•	•	•	•	•
8/4 (1-1/2")			•	•			

All available in 12 ft. lengths
